DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Applicant's invention has been found novel and inventive over prior art. Claim 21 is allowable because prior art fails to show a shock or vibration sensor attached to a hose to determine the striking of the hose with an object and terminating the flow of the fluid therein. Claim 28 is allowable over prior art because prior art fails to show a shock or vibration sensor attached to a hose to determine the striking of the hose with an object and transmitting a disconnect signal. Claim 33 is allowable because prior art fails to show a shock or vibration sensor attached to a hose to provide a shock signal to a transmitter which in turn produces a disconnect signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Waldbeser (US 5263824) discloses a remote controlled shutdown for hazardous material transport vehicle. Lemmon (US 6827112) discloses a system and method for controlling a hazardous fluid distribution facility. Gunton (US 599087) discloses a timer and alarm apparatus for controlling delivery of fluid material. Vernet (US 6412512) discloses a pressure control valve.
